**DETAILED ACTION**

1. Applicant's cooperation is requested in correcting any error of which applicant may become aware in the specification.

***Information Disclosure Statement***

2. The information disclosure statement submitted on 03/04/2005, has been considered by the examiner and made of record. See attached form PTO-1449.

***Drawings***

3. This application has been filed with formal drawings.

***Specification***

4. \*\*\* The disclosure is objected to because of the following informalities: the Applicant should have provided the US. Patent Application Serial No., and the filling date on line 3 of page 1. Appropriate correction is required.

\*\*\* The abstract of the disclosure is objected to because the title of the invention on the Abstract (page 19) is "HIGH SPEED OPTICAL ELEMENT SWITCHING MECHANISM" is incorrect. Correction is required. See MPEP § 608.01(b).

***Allowable Subject Matter***

5. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record because none of the references in alone or on combination discloses a switch assembly comprising: an arm assembly configured to rotate; a primary spring coupled to the arm assembly; one or more secondary spring disposed in the switch assembly; and a latch assembly,

wherein the latch assembly disposed in the switch assembly and operable to (i) selectively hold the arm assembly in either the first or second rotational positions and (ii) selectively release the arm assembly from the rotational position in which it is holding the arm assembly (as discloses in claims 1 and 15).

The underline limitations are critically, since the instant switch assembly reduces the amount of shock and vibration generated when latched; uses less power to release it from a latched position; and avoid rapid movement of the wheel can cause disturbances in the system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Pan et al (5,999,669) reference discloses an optic switch manipulate an optical signal comprising collimating lens and a prism between collimating lenses.

This application is in condition for allowance except for the following formal matters:

The objections of the abstract and the specification as discloses above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
